It is the second time that Stanships Inc, which controls the 35,185-dwt **AMERICANA** (built 1979), has been cited by authorities for violations tied to the unlawful discharge of waste water. The **AMERICANA was held in New Orleans**, Louisiana on 8 November when officials observed a piece of six-foot long pipe attached to the OWS, which is believed to have been used to send oily water overboard, a US Coast Guard spokesman confirms.
