## GENERAL VESSEL INFORMATION:

LOMAR SHIPPING - From reports we hear that the 566,800-cbf reefer **ARCTIC SWAN** (built 1973) was acquired by LomarShipping, in a very swift and positive deal. Lomar is said to have snapped up the ship jointly with undisclosed Russian interests soon after its circulation for sale by Holy House of Sweden. One source reveals the vessel was delivered in mid-March after the payment of \$1.3m. The Arctic Swan was probably bought for immediate work in the spot market in spite of the reefer high-season slow-down.

Lomar is working the tail end of a contract with Sunways for December-to-May banana shipments from Ecuador to Russia. The company has expressed a strong preference for operating outside pools. Many consider it able to secure higher rates than others.
