MIN RONG LNG SHIPPING CO LTD 2008-09-08 LRF  
Ship manager Date of record Source  
CHINA LNG INTERNATIONAL 2008-09-08 LRF

### SALES, TRANSFERS & RENAMINGS:

MIN RONG	2009-	Min Rong LNG Shg. Co. Ltd., Hong Kong

### GENERAL VESSEL INFORMATION:

Hudong-Zhonghua has already delivered the 147,000-cbm DAPENG SUN & DAPENG MOON to China LNG Shipping (Holdings) Co (CLNG), a joint venture between China Merchants and Cosco.

A third 147,000-cbm vessel, the **MIN RONG**, will be delivered to the same company next week. A delivery date of 18 February was postponed because senior figures at CLNG were unable to attend the ceremony.

The LNG newbuildings, China's first, proved a steep learning curve for the yard. A large amount of kit had to be reinstalled on the first ship, delaying delivery of the first two vessels. But in all its negotiations for LNG-supply contracts, China has continued to fight hard to maintain control over the shipping element and is keen to see additional domestic or foreign orders.

In total, five ships have been ordered by CLNG. The first trio, of which **MIN RONG** is the final ship, was ordered against long-term business to carry cargoes from Australia's North West Shelf project to China National Offshore Oil Corp (CNOOC)'s Guangdong LNG terminal.
